

New Hospital Car

Has Been Inspected And Approved By Officials At Ottawa

Canada's first hospital railway car, taken to Ottawa for inspection by medical, army and railway officials, has been approved. It will be a model of many similar cars to be provided as the need arises.

Complete, neat and completely equipped, the Akshi-suburban car will be used throughout Canada to bring wounded soldiers back to the homes direct from the battlefield.

Ship loading at St. John's of medical personnel was in charge of bringing the coach from Montreal, where it was fitted out in Canada. It is a railway coach, built by the same car had been inspected and approved by high officials of the government and medical corps who suggested minor alterations in design which may include showers.

A separate compartment provides quarters for two nurses, and an emergency compact room for two complete living quarters for the medical officer, who is also provided with a temporary, three quarters for the orderly, complete in all respects, and complete in all respects.

A first-aid kit is provided, but for the most part soldiers will be fed from the dining car, which is the only one of its kind in the country.

"Most wounded men will be able to sit up," Col. Jenkins explained to the newspaper. "These cars will be used only for bed-patients, and it is planned to include only as many cots as may be necessary in the hospital train, composed mainly of patients and hospital personnel."

Honor of being part of the No. 1 hospital car is proudly held by the Akshi-Bach, a Canadian-born C.M.R. veteran from Montreal, who served in a similar post in 1918 as a medical officer and national representative of wounded Canadian soldiers returning to their homes.

Forestry Corps

Twenty Companies To Be Raised In Various Parts Of Canada

Notification of a Canadian forestry corps for service overseas was announced by Hon. J. L. Hulton, deputy minister of the interior.

Brigadier General John B. White of Montreal, who commanded the first Forestry Corps in Canada, said in the last war and was deputy director of timber operations with the British army, will be in charge of the corps.

Twenty companies will be raised in various parts of Canada, six of them to be recruited immediately in the forestry regions of Quebec, Ontario, Montreal, Quebec, Saint John, Winnipeg and Victoria. The others will be recruited as needed.

The companies will receive instruction before leaving for overseas, and men who are skilled in forestry and lumbering and allied trades will be given preference.

Recruiting will be carried out through the military districts of British Columbia, Alberta and Saskatchewan, and will be associated with the forest industries in the field. The director of Canadian Industrial Paper Company and president of the Canadian Forest Industries Association.

Fortune In Small Bag

French Banker Took Journey To New York By Air

One million dollars in jewels—bejeweled in the largest sum of money ever carried by a private passenger—arrived on the Yankee Clipper on a small handbag carried by the French banker, Robert de Rothschild, famous French banker.

The jeweller included a \$100,000 double-strand pearl necklace and jewel-studded old Rothschild family diamond—diamond ring, sapphire pendant, ruby and emerald rings.

When Edward, one of the richest members of the great European Rothschild family, left for his French mansion described by French press four years ago as "one of the richest of France" he carried with him as much as \$100,000,000 in jewels.

Chief Scout For Canada

Part Of Athlete Aids Title To Long List

Chief Scout for Canada is the new title added to an already impressive array that have been assumed by the Governor-General, the Earl of Athlone. During his tenure as Governor-General of South Africa, Lord Athlone was Chief Scout there and was largely instrumental in affixing British English-speaking and native Scout organizations.

Name Of Town For Naval Vessels

According to Rear Admiral Percy W. Snelton, Chief of the Naval Staff, the name of the "Cervantes" class ship but being completed in Canadian shipyards, will carry the name of the town of Cervantes, Canada. The Canadian Navy's destroyers and minesweepers are named after rivers and from other geographical sources.

Bill—Would you object to a husband who smoked in the house?

Bill—Yes, that I intend to keep quiet about it until I get one.

Bain Lining

Yet To Be Benefited If It Has Any Deteriorated Value

Bain lining is a lining practice designed to conserve run-off water in Canada. It has been introduced on the Canadian prairie for many years. The value of this practice, however, especially in the past few years, has been investigated by the Dominion Experimental Farms.

It is a practice which has been followed over a period of three years would indicate bain lining has had no decided benefit either on crop yields in the drier regions of the prairie or on the soil.

Bain lining, or damming lining, is a cultural operation whereby narrow, linear, concrete drains are formed on the surface of the soil to be used as small reservoirs for water which would otherwise be lost.

At present, the Government is fully effected by forming small dams of earth at intervals of eight or ten feet along a lateral furrow, the furrows being about three or four feet apart.

These concrete drains, when equipped with a tripping device to form the dams, are available for use by the farmer. The Government is doing nothing to help him, but the Government is doing nothing to help him.

"Most wounded men will be able to sit up," Col. Jenkins explained to the newspaper. "These cars will be used only for bed-patients, and it is planned to include only as many cots as may be necessary in the hospital train, composed mainly of patients and hospital personnel."

Red Cross War Efforts

Hard On Poultry

Flucks Should Be More Closely Watched During Heat Waves

Heat waves are likely to cause very losses among poultry due to the fact that birds do not have the sweat glands that help to regulate body temperature in other animals. We must watch our flocks more closely in hot weather, declare National Red Cross, in Country Government House, Ottawa.

Open doors, windows and other apertures help to keep the needed circulation of air on the farm. The New Jersey College of Agriculture points out that an insulated room means a reduction of 10 to 15 degrees in temperature in the home and recommends painting the room with white or aluminum paint, or even coating it with white gravel, to reflect the sun's heat. Sprinkling the roof and even the litter in the pen with water is also recommended to relieve heat conditions.

The Trespasser

Story Of An English Duke, Who Turned The Tables

A story of English duke who turned the tables on a castle with beautiful grounds which he has thrown open to the general public. The duke, who has a beautiful garden, however, kept private his house and his duchess were under the impression that the duke was not at home when they saw a family party appearing a plain cloth right in the middle of the house lawn.

The Duke walked out to make a personal protest.

"Look here," he said, "there are plenty of your nice quiet spots round here for you to have your picnic. Don't you have to leave?"

"At the father of the house came out in a pillar-box hat, saying loudly was entitled to own all that according to the law of the land, people he wasn't going to be treated like a dormal by the aristocracy."

"Since that is your attitude," said the duke quietly, "I must ask you to leave this place."

"You can't scare me!" blurted the intruder—and gave them.

The request came rather late, for a small red villa in a suburb of London, father and family were having their midday meal. Suddenly a small black dog came running in. One of it stopped the ducks and ducks. They entered the villa and the ducks entered the villa. They entered the villa and the ducks entered the villa.

"We've decided that we have a family party," said the duke. "We've decided that we have a family party," said the duke. "We've decided that we have a family party," said the duke.

"We've decided that we have a family party," said the duke. "We've decided that we have a family party," said the duke. "We've decided that we have a family party," said the duke.

would be the case with elevators. It is further proposed that provisions be made in order that farmers may borrow on their stored grain. Under the circumstances, it would seem that the proposition which every wheat producer in the West be given an opportunity to market a certain percentage of his crop in delivery. As is pointed out, if elevators are unregulated a few farmers may be able to monopolize the local elevator service, a sample of this have arisen during normal times of the past.

While the provision of suitable granaries for farm storage entails additional expense, to some extent this would be offset by payment of storage charges by the Wheat Board to the farmer as is done in the case of elevator companies. In effect, too, a well-built granary that will pass the necessary inspection for storage is a distinct asset to farm property.

Admittedly it is impossible to see ever for ahead at the present time to determine the future of Canadian wheat, but one thing is sure. It is always wise planning in the face of a dark future. It is the duty of the farmer to prepare for the worst. If not of actual famine, Joseph in Egypt prepared against a seven year drought. Having abundant resources, Alberta farmers likely to harvest this year's successive good crop, but here, too, the dread spectre of drought is not unknown.

DEMOCRACY OR DESPOTISM?
The War Savings Bureau for Alberta has adopted a slogan: "Democracy or Despotism—Which?" The twenty-third birthday of our Dominion is with us, and we begin to realize that after so brief a national life we are faced with the alternative of such a thought. It is a question that has been raised. Even yet they sound to us more like words than realities. Only in recent days have we been faced with the question of "Which is to be our destiny?"

Democracy is a system of life which we are trying to build up. Man has not yet made his home perfect, and democracy is a succession of experiments in theory of thought and of action. It is to this somewhat faintly but noble conception that we have to give.

Despotism is that which has cast its black shadow over Europe, and seeks to engulf the world in its folds. Opposed to it today stands the Empire of the future. The least of that Empire is facing dreadful days with courage and fortitude. We in the outer reaches have the high privilege of doing something to help.

Good means and Government have not yet met, but that the deep spirit of our people can be shown in buying War Savings Certificates and Stamps. With every purchase, however small, will go a heartiness for the Empire and for Christianity. The accumulation of life buying is an accumulation of love and earnest effort on behalf of our country.

We who may not go to war can do nothing that will count more than lending our small and intimate savings to our country. We can do nothing that will register more deeply in behalf of ultimate success.

Local and District

John ("Buddy") Jackson spent Stamped week in Calgary.

J. J. Bradburn, Lethbridge, is visiting for a few days in Delia.

John Battle was a visitor to Calgary during Stamped week.

M. H. Hall was a recent visitor to Calgary.

Geo. Beaton, of Majestic, took in the Stamped week in Calgary.

Tommy Chapman spent a few days in Calgary during Stamped week.

J. C. Knight, of F. R. Finger and family visited Calgary during a Stamped week.

Mr. and Mrs. Art Hunter and family, of Rocky Mountain House, were the guests of Mr. and Mrs. Gamble in Delia last week.

The third annual seed day of the Delia A. I. was held on July 10, and was held at a future date.

W. A. Low left recently on a business trip to Calgary.

Mr. and Mrs. W. B. Dunlop left by motor last week to spend a vacation at Little, Manitoba.

J. Y. Fulton, of Majestic, took in the Stamped week on a short visit to Delia.

A. K. McDonald, of Majestic, was a visitor to the Stamped week during Exhibition week in Calgary.

Mr. E. A. Thompson was visiting in Calgary during Exhibition week, returning early last week.

Mrs. Wm. Gibson and family left by motor on Monday of last week for a vacation at Bryan Lake.

Mr. and Mrs. C. C. Hanks, of Majestic, were visitors in Calgary during Stamped week.

Dr. and Mrs. F. J. Natherton and family left by motor last week for a vacation at Merril and Vancouver, B.C.

Joe Beaton returned home on Monday of last week following a few days' visit in Calgary and the Stamped week.

Mr. and Mrs. Andrew Jaon, of Pinewood, Ont., are visiting at the home of the latter's parents, Mr. and Mrs. John Dugan.

Mr. and Mrs. J. J. Owen returned home on Monday of last week, after a vacation motor trip in the Banff and Lake Louise districts.

J. T. Armstrong, of the Farmers' Store, left by motor on Monday of last week for two weeks' vacation, which he will spend at Blackie.

R. C. Zakariasen has returned to his home from Extonville Springs, Mo., U.S.A. He has been at the McCleary Sanatorium and Clinic for the past few weeks.

Mr. and Mrs. Wm. Luckie left on Tuesday night's train for a month's vacation in the East. Stopping off at North Bay and other intermediate points to visit relatives, Mr. Luckie also intends to visit his old home town, Redford, Ontario.

Copious rains have fallen during recent days, a welcome change in the hot weather, which is often very hot and dry with an occasional shower in the Delia District.

The 17th, over two inches of rain fell in one week, a cloudburst over the village on Wednesday evening according to one local who is about an expert.

An official report regarding conditions to the industry, now gathering in general use and other vegetables, has been growing to maturity.

A terrific hail storm, with hail stones some miles west, occurred on Saturday evening last. Little rain fell in the village, but heavy rain was experienced north and south in the district. Two such storms—one at 8:30, the other at 6 p.m.—broke over the village early on Tuesday.

When another inch of rain fell, Peals of thunder accompanying the last of these so violent as to shake to their foundations the stoutest local residences. Some hail is reported.

A.M.I.C. ESSAY CONTEST

Kelvinale School Again Has Chosen to win Prize Awards

For the second time the Kelvinale School is represented in the prize awards of the essay contest, sponsored by the Automotive Manufacturers' Industries of Canada.

Charles Thompson, 15, in grade eight, was the third prize in the contest, a sum of twenty-five dollars.

Owing to the fact that his sister, Joyce, won the second prize in the contest last year, and enjoyed the last year of the contest, she was the first and second prize winners.

Charles was disqualified for either of these prizes. The contest is divided into Junior and Senior sections for the three prize provinces, six divisions in all, and the number of entries submitted will vary in each of its divisions.

Sixty-six prizes were awarded in the two divisions in Alberta, and of the one hundred fifty prizes awarded to children in Calgary and Edmonton, while practically all the rest, with the exception, were won by pupils of the schools.

The contest is a contest in the school of the Kelvinale School for the past two years has been John Auerod, of Calgary.

Fooling Vegetable Seeds

About the Weather

Lethbridge Experimental Station, Weekly Letter.

Planting seed of vegetable such as peas, radishes, lettuce, etc., at weekly or fortnightly intervals is generally recognized as a satisfactory method for providing a continuous supply of green vegetables for home use during the summer months.

However, poor stands of plants due to faulty germination are obtained quite frequently, especially when the seed is sown during hot weather.

This is true of the vegetable seed as well as that of inferior quality seed. Invariably it is found that the seed is not viable without special treatment.

This rotting during hot weather has seriously interfered with the periodic seedling experiments at this station in some seasons. As a result, it was decided to try to discover some method whereby this difficulty could be avoided.

At first the attempt was made to germinate summer sown seed were rewarded with only moderate success. Sowing the seed for 24 hours prior to sowing and irrigating immediately after it had been planted gave a 65% stand of plants.

Similar results were obtained when the seed was planted dry, then irrigated and finally covered with a mulch of grass clippings or rotted hayward manure.

While these results were encouraging, it was felt that they could be improved still further. However, it was concluded from the results that it is also necessary to control temperature as well as moisture conditions, so as to encourage more efficient seed germination.

It is well known that in the early spring, particularly during cool weather, and in general germination rapidly and uniformly.

In fact in mind, it was thought that intended for hot weather planting should be subjected first to cool conditions prior to sowing.

Accordingly, on several occasions a quantity of seed was soaked in water for 24 hours and then placed in a cold room for a period of six days. At the end of this period, the seed had begun to sprout. It was then planted and immediately irrigated.

The results of this practice were outstanding. In most cases 95 per cent of the planted seed germinated freely and vigorously.

It is now being used for sowing seed for hot weather planting, and the results are very encouraging.

However, any cool cellar should be fairly satisfactory results, providing the seed is kept moist and is not permitted to become mouldy.

MUSLIN'S ENTRY INTO THE WAR

Mussolini's Action The Most Ignoble in History

History will, I believe, record no action more ignoble than that of Mussolini. During these tragic months he has not like a warrior bent on prey waiting for brave men to die.

Today he has declared war on those who save the traditional friends of his countrymen.

Cautious and cynically, he has chosen what he believes is the fatal hour for his wrong and the treacherous blow.

Fearful overtures, proffered commission of ancient friendships sealed by the memory of the sacrifice in the cause of freedom, all these he has bartered for the slim conquest and the honour of power.

No one can forecast the horizon of this contest, a sum of twenty-five dollars. Owing to the fact that his sister, Joyce, won the second prize in the contest last year, and enjoyed the last year of the contest, she was the first and second prize winners.

Charles was disqualified for either of these prizes. The contest is divided into Junior and Senior sections for the three prize provinces, six divisions in all, and the number of entries submitted will vary in each of its divisions.
